

COLLABORATION

The collaboration with National Institutes and International Universities has established the unique identity for KLE University's College of Pharmacy, Bengaluru.

Reputed Universities and Pharmaceutical Industries have shown keen interest to collaborate with the Institution considering the expertise of the faculty and excellent infrastructural facilities. The Institution has been immensely benefited by the collaborative research activity through joint publications and patents. The collaboration has undoubtedly enriched the knowledge of the faculty and also improved the quality of ongoing research.

The Institution has been encouraging faculty members to undertake interdisciplinary projects and publish the research outcomes in high impact peer reviewed journals. The promotion of interdisciplinary research has helped to materialize extramural funding from different funding agencies.

Academic and financial benefits

1. The increase in number of collaborations with National and International agencies has led to improvement in quality of the on-going research.
2. The collaborative projects have supported transdisciplinary and multidisciplinary work that in turn has yielded quality publications in high Impact Journals, Patents and Book chapters.
3. The research outcomes have helped to share the scientific knowledge to the society.
4. Research collaboration with NIH has helped for screening of Anti-tubercular and Anticancer drugs.
5. Overall, Collaborative research has helped to win recognitions through awards, distinctions and grants.
